Karlo Pocrnić

2026

Hello.

I'm Karlo Pocrnić.

Graphic Designer / UI Design specialist

I'm a Croatia-born designer based in Zagreb, with over 15 years of experience delivering strategic, design-led solutions. My work combines strong visual execution with clear, purposeful thinking.

I continuously explore new creative methods and technologies to achieve refined, effective results. Alongside client projects, I pursue select personal work that pushes boundaries and sharpens my perspective.

I believe impactful design is rooted in solid strategy and bold thinking to solve complex communication challenges with clarity and precision.

Education

BSC in Information science	2013
Faculty of Organization and Informatics, Varaždin	
Microsoft Certified Professional	2012 - 2012
Microsoft Inovation Centre, Varaždin	
Air Traffic Control Trainee	2015 - 2016
Croatia Control, Zagreb	

Work Experience

Owner - Deka, obrt za dizajn	2019 - present
Corporate design, Branding, UI/UX design, Graphic design, Web design	
Design Lead - CloudSense	2021 - 2024
Graphic design, Web design, User interface design, User experience design, Team management	
Graphic Designer - Papar	2016 - 2017
Graphic design, User interface design, User experience design, Web design, Wordpress maintenance, Website content writing	
Graphic Designer - Kico soft	2016 - 2016

Zema Global Science Workshops for Kids

Decisioning Advantage

Delivered by Zema Global Decisioning Infrastructure
For energy, commodities and financial industries

Decision-Ready Data | Curve Analytics | Total Portfolio Advantage

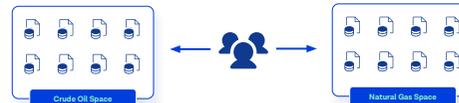

Spaces for Curve Manager

Support smarter Curve access.
Simple, tailored and automated.

Zema's Curve Manager powers how data flows from market sources into your downstream systems. With the addition of Spaces for Curves, organizations now have even greater flexibility, stronger security, and simplified administration when managing Curve access.

A Space is a secure, shared workspace where teams can manage and access Zema Global objects with the right permissions automatically applied. Here's what Spaces delivers:

Centralized Ownership

Curves belong to a Space, not an individual.
Ensures business continuity, prevents data silos, and keeps ownership clear and consistent.

Automatic Permissions

Curves created or moved into a Space automatically inherit the right access controls.
Sensitive data is always governed by organizational rules, strengthening security and accuracy.

Zema Marketplace: Publisher and Scheduler

Simplifying Customizable Access to Data Feeds

Publisher

Zema Global's Marketplace Publisher is a web-based interface that delivers the most up-to-date consolidated market data feeds and proprietary data into a user-friendly platform.

Publisher is the preferred tool for feeding any ETRM or CTRM system.

Providing users with direct access to Zema Global's comprehensive data library, Publisher simplifies implementations and eliminates the need to download and process large data files—all while saving the user time integrating data into their own tools and applications.

Web-based User Interface

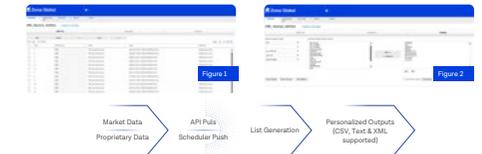

Feed any system and generate files with Publisher's web-based UI. Publisher was developed so any user can easily create and pull lists or schedule data to be called at custom intervals automatically using the Scheduler application.

Streamlined System Integration Interface

Grab the data you need quickly from Publisher via API, programmatically integrating with your system. Our Scheduler tool, part of the Publisher product suite, further automates this process with a set, custom schedule of data downloads.

List Transfers

Share lists securely among users and admins at your organization with the flexibility Publisher provides.

Data Availability

Access 3500+ data feeds from our stock of hundreds of vendors and develop lists from that data in Publisher. Users can also incorporate their own proprietary feeds to centralize their data and streamline their processes.

API Connectivity

Create, edit, and run lists in Publisher by using API calls. In addition to the Publisher UI, REST API calls let users view list configurations, create and edit lists, and pull the data associated with their Publisher lists.

Logging

Gain more transparency regarding list edits, what lists were run and from what machines, and what API calls were made.

API Connectivity

Organize the data sets that matter with Publisher's ability to funnel vendor-specific and proprietary data into lists that be manipulated for your needs. Publisher can accommodate numerous formats and custom mapping columns that categorize output, align company specific identifiers with Zema Global Symbols, and utilize dynamic mapping logic for more complex functionality.

Publisher's easy-to-use interface provides a way for users to select preferred data sets and create custom mapping columns (Figure 1) that produce desired output files to include client-specific identifiers, symbols, or terminology within data lists (Figure 2).

Gain your Decisioning Advantage

Delivered by the Zema Global Decisioning Infrastructure

Decision-ready data | Curve analytics | Total portfolio analytics

In a world of volatility, interdependence, and relentless change, executives who secure a Decisioning Advantage will be the new leaders of the energy economy — deciding faster, acting smarter, and outperforming competitors.

Why gaining a Decisioning Advantage is critical now

Companies engaged in the energy and commodities industries face a common strategic challenge — complexity is multiplying across every aspect of business.

Data volumes are exploding: The overwhelming influx of information from markets, operations and digital platforms is making it harder to filter insights, act quickly, and maintain transparency.

- New asset classes are in demand. The rise of carbon credits, renewables, and digital assets is forcing companies to adapt systems, valuation methods, and trading strategies at speed.
- Consumption models are changing: Shifts in customer behavior, energy transition goals, and digital adoption are disrupting demand forecasts and business models.
- Deals and contract structures contain more variables: increasingly complex contracts and transaction frameworks demand more sophisticated

- Compliance demands are rising: Expanding regulatory requirements across jurisdictions are creating heavy reporting burdens and raising the cost of compliance.
- Geopolitical disruptions continue: Political instability, trade disputes, and sanctions can suddenly reshape supply chains, pricing, and access to key markets.
- Risk factors are increasing: Climate change, cyber threats, and market volatility have introduced layers of uncertainty that complicate planning, pricing, and risk management.

This is the complexity crisis. It demands a continuous calibration of the business to outperform in the face of uncertainty, risk, and structural, compounding change.

Address the complexity crisis and unlock multi-asset analysis

Zema Global gives executives a Decisioning Advantage in the challenging, increasingly fast-paced energy economy.

A decision-ready data foundation

With Zema Global, decisions are always based on a consistent and trusted source. The same validated, high-quality market data is available to every model, desk and business unit.

Data confidence with Zema Global

- Curve analytics, automation and precision
- Data distribution and lifecycle management
- Quality control and data governance
- Dynamic pricing from a single source of truth
- Asset valuation and optimization
- Total portfolio and risk management
- Market simulation and scenario planning

Unlock total portfolio analysis
Zema Global unlocks total portfolio analysis, so you can see your entire portfolio in one strategic view. It captures institutional knowledge, enforces best practices, and delivers reliable, comparable results over time.

Lay the foundation for AI
Start with decision-ready data that is verifiable, traceable, auditable, and replicable. Build trust by applying AI to improve data management and analytics. And integrate decision-ready AI throughout your data and analytics platforms.

Unleash decision speed at scale
Guide fact, consistent and scalable decision-making throughout your organization. As your business grows, apply the same proven frameworks and workflows for fast, coherent and strategically aligned decisioning.

TOP SECRET

Zagrebački kolektiv poluprofesionalnih kazalištaraca
Theatre

Zagrebački kolektiv poluprofesionalnih kazalištaraca is a group of amateur actors who have been members of the Theatre Tirena drama group for years. They push the boundaries of traditional drama and comedy performances in theatres. They needed a wordtype style logotype that would be out of the ordinary and yet classic enough to get recognised. I designed poster for their new satiric comedy performance and other digital designs for club promotion.

BlueStars
Football Academy

Blue Stars Aachen is a private soccer school that offer parents and children professional training. Their football school attaches great importance to tactics and game intelligence. Client wanted a complete redesign of school visuals. My job was to do research and design a brand identity as well as design for printing materials for promotional purposes

Jurica Mlakar

Personal Branding

Client wanted to get more attention in the job market to find a new and better job in the international circle. Needless to say, I made him personal branding design and in a matter of months he got a new job in a large international company that is a leader in Salesforce-native Omnichannel Commerce.

Jurica Mlakar

Burgschänke

Restaurant

Set in the Palatinate Forest and a 5-minute walk from the ruined Hohenecken Castle, this modern country restaurant needed a fresh brand redesign that would appeal to a different target customer to attract new younger high end customers. Customer needed a full brand identity package from logotype to invoices, brand guidelines, business cards, posters, social media. It was important to take care of brand consistency throughout all the different platforms and media.

U4

User Interface.

Red Mountain SAR App

Search and rescue service that primarily allows for users to send a distress signal with the press of a button. With current methods of communication with rescue services, providing unified information and sharing of precise location are either non-existent, very limited, or extremely outdated. RedMountain aims to fix that by bridging the gap between mountain rescue services and troubled users themselves.

Messenger

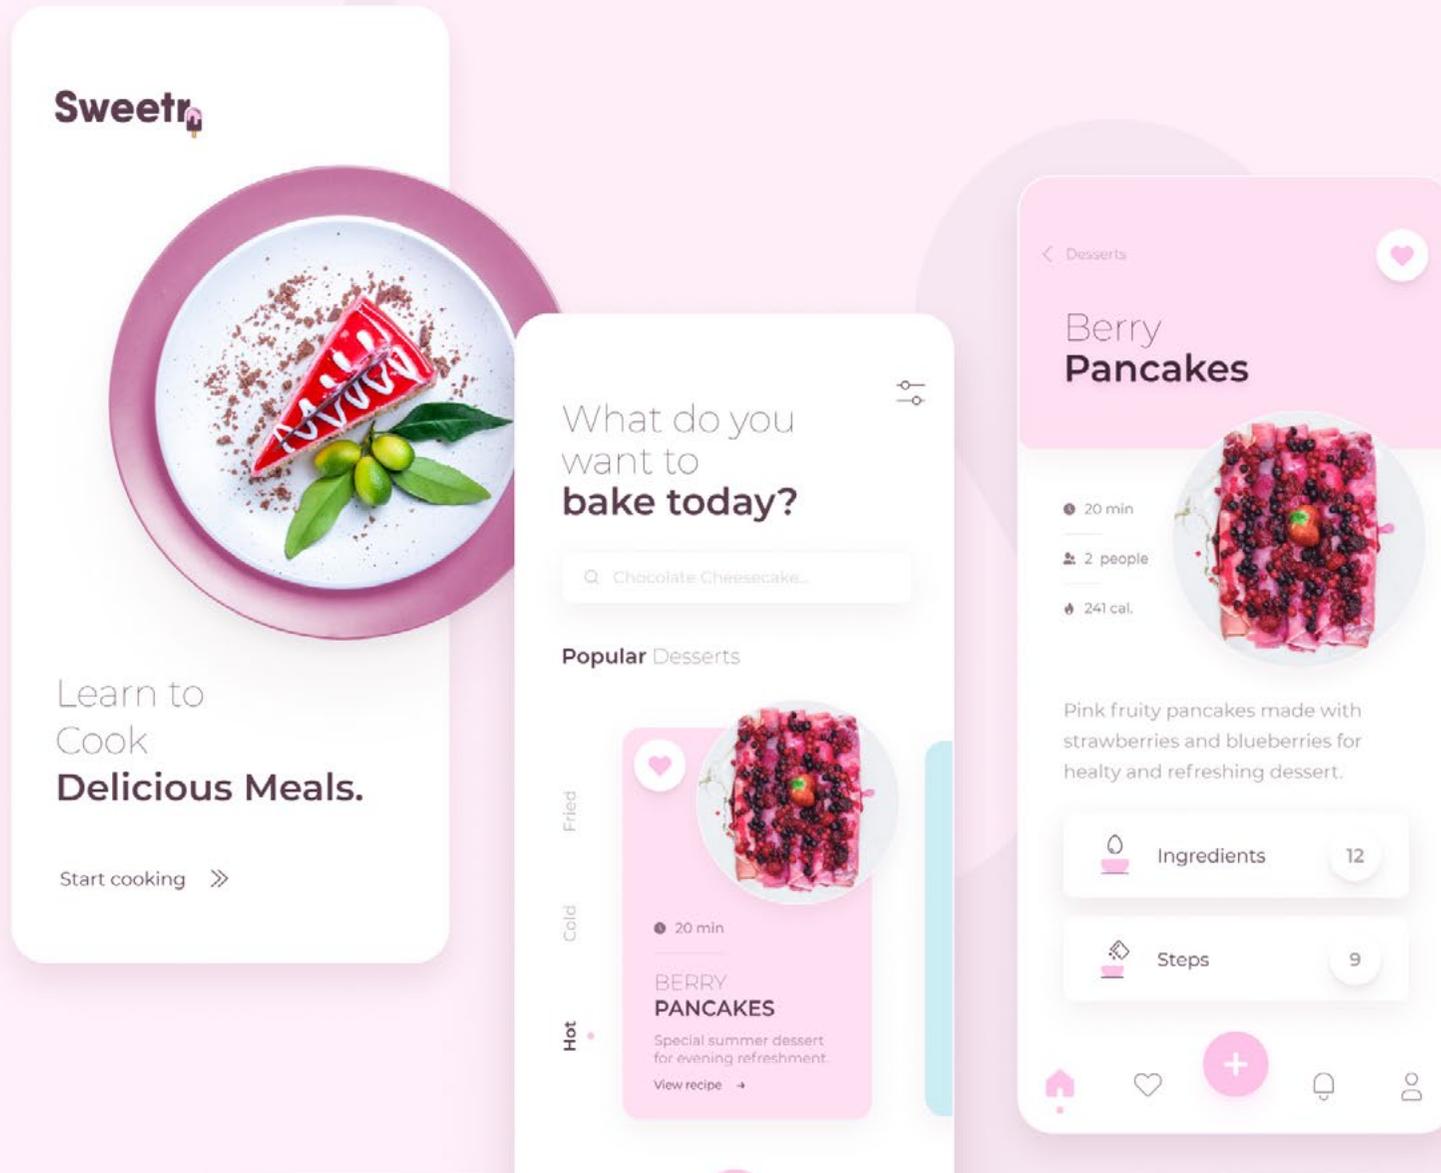

Concept Chat App

Reimagination of modern iOS messenger application. Complete UX process was done by UX designer by Karlo Pocrnić. Concept for this iOS messenger app is made for UpLabs challenge – Messenger App Challenge. Whole concept was made with user centric experience in mind that allows the users to use minimal number of steps for any action which makes the experience enjoyable to use. The design is stripped to bare minimum with just a little subtle details and accents for attractive looks.

Sweetr Recipes App

Recipes mobile app for all things sweet. Clean and modern UI designed from scratch for a project in development. My job was to develop the whole UX from scratch to end prototype. Now the developers are taking over.

AskBiz Global marketplace

This project was made before all the social media selling platforms with main intent to develop a stand alone professional network where all B2C relationships could be made, from buying products to customer complaints. In this project I was personally involved in whole process of business development but more importantly this was a project where I led the whole UX design process from idea to product.

Nova Plus
Streaming platform

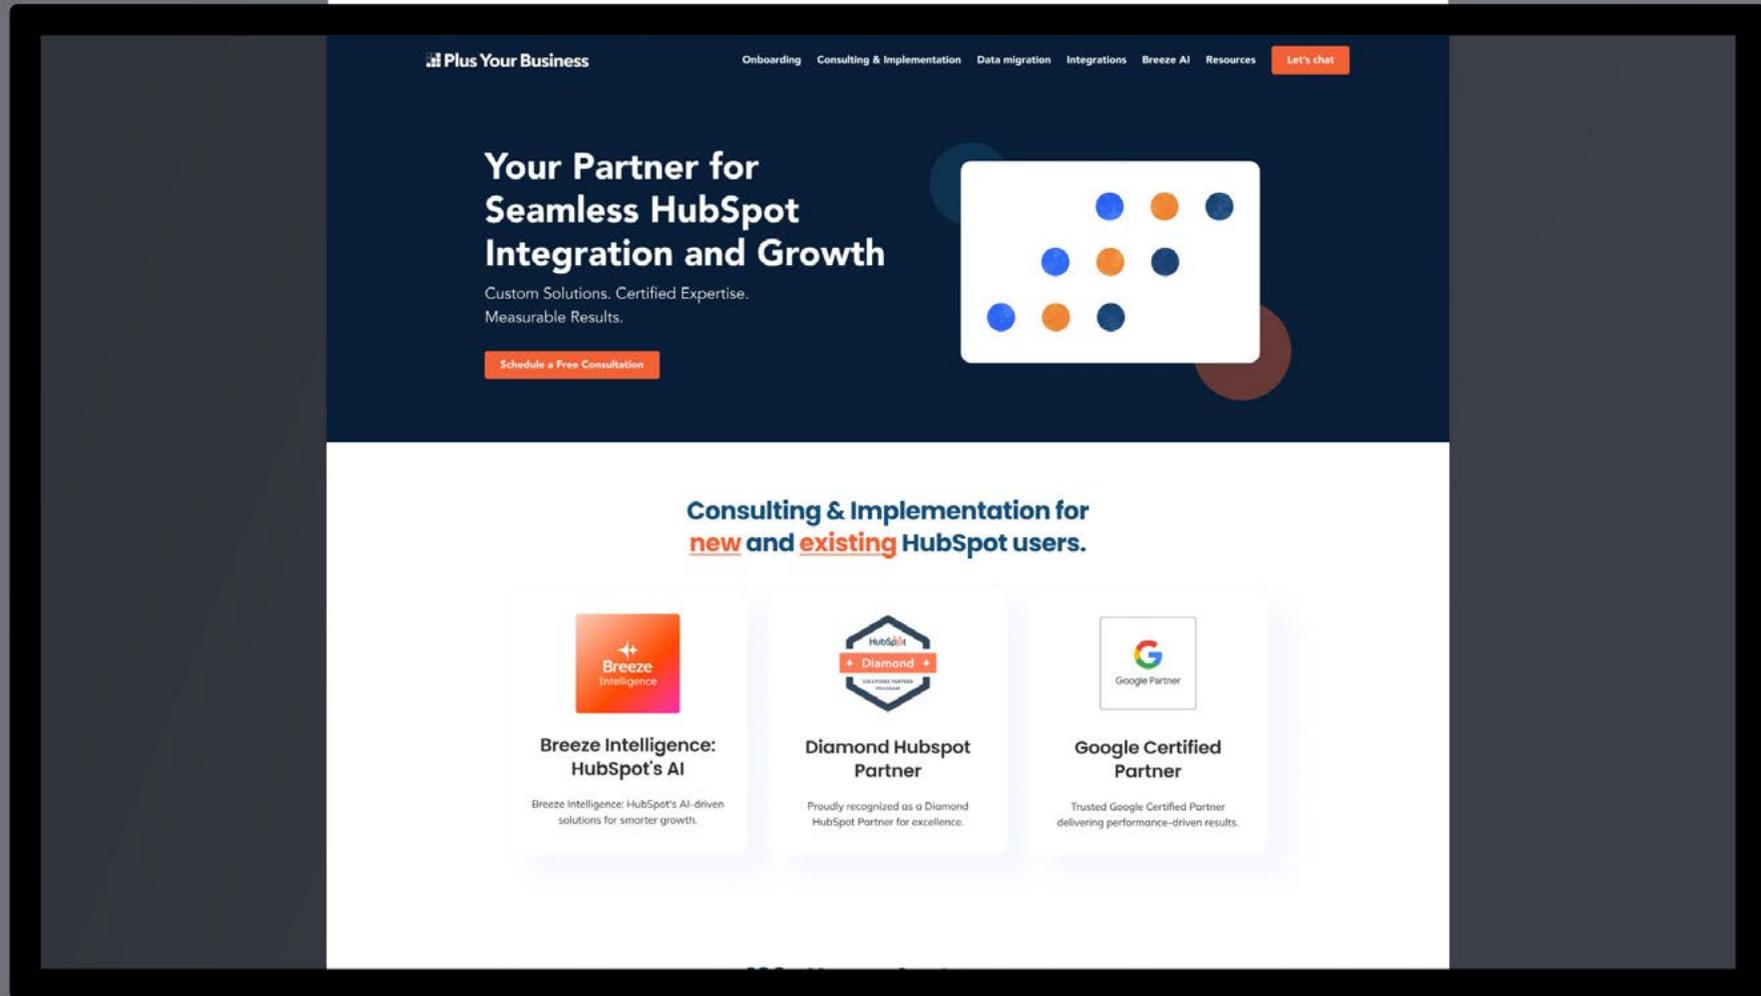

The screenshot displays the Nova Plus streaming platform interface. At the top, the 'nova plus' logo is on the left, and navigation links for 'Videoteka', 'TV uživo', and 'Gledaj TV unatrag' are in the center. On the right, there is a search icon, 'Moj sadržaj', and a 'Prijava' button. The main content area features a large banner for the movie 'Toma' with a portrait of Tomo Zdravković. Below the banner, a 'TOP 10' badge indicates it is the most watched today. A short description follows: 'Film "TOMA" je jedan impresionistički portret Tome Zdravkovića koji prikazuje same njegove početke, baš kao i vrhunac slave.' Below this are two buttons: 'Pokreni' (Play) and 'Više detalja' (More details). A horizontal carousel of movie thumbnails includes 'U Dobru i ZLU', 'pod istim NEBOM', 'Kumovi', and 'VIKEND SA CALETOM'. Below this is a 'UŽIVO' (Live) section with thumbnails for 'U dobru i zlu', 'Hamburg 112', 'Bob Skov', 'Sibir', 'Na granici', and 'Dnevnik'. The 'GLEDAJ BESPLATNO' (Watch Free) section shows thumbnails for a soccer match, 'U Dobru i ZLU', 'Kumovi', 'pod istim NEBOM', and 'VIKEND SA CALETOM'. The 'NAJGLEDANIJE DANAS' (Most Watched Today) section features a numbered list from 1 to 6, with thumbnails for 'TALENT', 'Kumovi', 'PRICAJI', 'U Dobru i ZLU', 'Tečaj za stamljenja srca', and 'D'. The 'DRAMSKE DOMAĆE SERIJE' (Drama Series) section at the bottom shows thumbnails for 'U Dobru i ZLU', 'Kumovi', 'Larin izbor', 'najbolje GODINE', 'Pet sretnog pobjedom', and 'D'. The interface uses a dark theme with red accents.

Explore our leadership

About Us

CloudSense's Advanced CRM and Order Management engine enables wireless enterprises to increase productivity and profits. Our solution is complemented by Product Catalog, Order Management, Contract Management, Document Generation and Digital Commerce. Combined, these capabilities help businesses reach faster, with more fully optimized customer journeys across the entire customer lifecycle.

How does your BSS compare to...

The screenshot displays the CloudSense website homepage. At the top, the CloudSense logo is on the left, and a navigation menu with links for 'Industry Solutions', 'Resources', 'Customers', 'Company', and 'Partners' is on the right. A 'Contact us' button is also present. The main hero section features a dark blue background with a large graphic of interlocking puzzle pieces in purple, red, and green. The headline reads 'Make product mismatches history with CloudSense'. Below this, a sub-headline states: 'Ensure that all items in a given solution work together with clear visual indicators whenever a configured product is incompatible with others in the cart.' Below the hero section, a white section contains the heading 'Ensure delivery accuracy by providing instant compatibility verifications'. To the right of this heading is the sub-heading 'Efficiently manage compatibility rules without coding'. Below the sub-heading is a paragraph: 'Our Compatibility Rules Service ensures that all items in a given solution work together by providing alerts whenever product rules are broken. By applying these rules consistently throughout the end-to-end sales journey, CRS streamlines product governance and reduces time wasted on reworking.' To the left of this text is a small graphic of a person's silhouette. Below the paragraph is a list of three benefits, each with a green circular icon: 'Minimize implementation efforts and improve time to market', 'Streamline processes and ensure accuracy with compatibility alerts', and 'Eliminate the need for extensive research on complex orders'. At the bottom of the page, there are three small icons: a rocket, a smartphone, and a document with a checkmark.
